

# Wildfire Smoke Safety Program

*Protect your employees from the hazards of wildfire smoke.*

2020 was the worst wildfire season on record. Wildfires are becoming more common with the changing climate and severe drought conditions. Experts are predicting the western US will continue to experience destructive wildfires in 2021.

KPA's **Wildfire Smoke Safety Program** is designed for employers—especially those in Western states—where drought conditions often lead to harmful and widespread fires. Consistent with Cal/OSHA's Title 8 regulations, the program includes online training, a written program, and a self-service inspection form delivered through KPA's software. There's also the option to add in-person consulting services to customize the program to your organization's needs.

This program is designed to help keep your employees safer during unhealthy wildfire smoke situations.

## Wildfire Smoke Safety Fundamentals

This online toolset provides training, a policy template, and an inspection form to help you be prepared for a wildfire smoke situation.

- Wildfire Smoke Safety Self-Service Inspection Form
- Wildfire Smoke Safety Written Program Template
- Wildfire Smoke Safety Online Training (15 minutes)

## Wildfire Smoke Safety Plus

Includes the Fundamentals content and training plus assistance from a KPA safety and compliance expert to customize your written program and implement hazard controls.

KPA solutions help clients identify, remedy, and prevent workplace safety and compliance problems across their entire enterprise. The combination of KPA's software, consulting, and award-winning training helps organizations minimize overall risk so they can focus on what's important—their core business.
